

The OphthaCoil : a new vehicle for the delivery of drugs to the eye

Citation for published version (APA):

Pijls, R. T. (2007). *The OphthaCoil : a new vehicle for the delivery of drugs to the eye*. [Doctoral Thesis, Maastricht University]. Universiteit Maastricht. <https://doi.org/10.26481/dis.20071217rp>

Document status and date:

Published: 01/01/2007

DOI:

[10.26481/dis.20071217rp](https://doi.org/10.26481/dis.20071217rp)

Document Version:

Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

The OphthaCoil

a new vehicle for the delivery of drugs to the eye

door Rachel Theodora Pijls

1. Various companies have developed new ocular drugs for better therapies, but the delivery of these drugs via a vehicle is the real challenge (dit proefschrift).
2. The OphthaCoil is a more efficient method for the delivery of drugs to the tear film compared to eye drops (dit proefschrift).
3. The OphthaCoil is a real eye-opener (dit proefschrift).
4. The arrangements for a clinical trial need an exact and exhaustive planning (dit proefschrift).
5. De toepassing van poly(methyl methacrylaat) botcementen met verhoogd röntgencontrast gebeurt op grond van een zeer zwakke wetenschappelijke onderbouwing.
6. Het is waarschijnlijk dat de klinische resultaten van de UFE procedure (Uterine Fibroid Embolization) nog zullen verbeteren wanneer gebruik gemaakt wordt van embolisatie-deeltjes die intrinsiek röntgenzichtbaar zijn.
7. Geen enkel synthetisch materiaal is bloedcompatibel.
8. ‘Biomaterials Science’ hoort als basisvak thuis in elk curriculum voor biomedische technologie.
9. Onderzoek verrichten binnen een samenwerkingsverband tussen industrie en universiteit is stressvol.
10. Als we wisten wat we deden, heette het geen onderzoek (Albert Einstein).
